

**BCS2s**  
Variable Speed  
Air Handlers

EXPERTLY CRAFTED FOR SUPERIOR AIR CIRCULATION THROUGHOUT YOUR HOME.

# BUILT FOR LIFE. YOURS.

**AIREASE**<sup>®</sup>

Built for life. Yours.

**AIREASE**

Experienced dealers know how  
to get the job done.

That's why they choose AirEase.™

The **BCS2S** circulates the air inside your home with **precision, efficiency and rock-solid performance**. It uses variable speed technology to deliver even temperatures, while lowering humidity and noise levels. That's why it's chosen by dealers who know heating and cooling equipment inside and out, and why you can feel confident that the BCS2S is perfect for your home.

## Inside the design of an AirEase BCS2S air handler:

## The advanced features of the AirEase BCS2S work together to bring you:

### CRAFTSMANSHIP

The **BCS2S** includes thoughtful details like **MHT Technology**, a special tube design that uses internal rifling to increase heat transfer. This allows the BCS2S to operate with **greater efficiency and performance**.

### EFFICIENCY

A **BCS2S** air handler provides efficient performance all year long, especially when matched with an AirEase heat pump or air conditioner. Variable speed technology inside **the BCS2S delivers maximum energy savings**.

### COMMITMENT

AirEase's dedication to a better product is backed by a 10-Year Limited Warranty on parts.\*

AirEase™ technology not only does the job of maintaining your ideal environment, it also does it quietly and efficiently.

### PRECISE PERFORMANCE

The initial cold blast of air that's often associated with heat pump operation during start-up is no more, thanks to a variable speed blower inside the BCS2S. This high-tech buffer builds speed slowly, allowing the air to be heated at a comfortable temperature before it's circulated throughout your home.

Gradual increases in fan speed also help control humidity levels during cooling mode and minimize operating noises. These same performance advantages are delivered by the BCS2S when it's combined with an air-conditioning unit.

#### VARIABLE BLOWER SPEED OPERATION

Gradual ramp up and down of the variable speed motor significantly reduces sound.

### COMFORT SYNC®

The Comfort Sync thermostat offers technologically advanced management of your HVAC system. From remote access via smartphone, tablet or laptop to live weather forecasts to an energy-saving One-Touch Away mode, you will enjoy more control and greater energy savings with just a few touches.

### EFFICIENCY

Maximize your energy savings by pairing the AirEase BCS2S air handler with a matched outdoor unit air conditioner or heat pump. The BCS2S's variable speed blower motor keeps your utility bills in check by running mostly at low speed and providing an increase in SEER (Seasonal Energy Efficiency Ratio) for matching outdoor cooling units. \*\*

### COMFORT

Enjoy cleaner air with Microban-infused drain pans that inhibit the growth of mold and mildew, making your home a healthier environment year after year.

AirEase with Microban protection

Others without Microban protection

\*Warranty applies to residential applications only. For terms, conditions and exclusions, see full warranty at alliedair.com.

\*\*On select AHRI matched systems.

The AirEase BCS2S. Chosen by those who have high expectations for HVAC system performance.

AirEase BCS2S air handlers consistently deliver excellence using a proven combination of performance and expertise that's put to the test every day in homes across the country. When you trust AirEase to deliver efficient, technologically advanced heating and cooling, you're making the right choice. **Because it's BUILT FOR LIFE. YOURS.**
